# WHAT IS RUBIX SIGNABLE

Getting documents signed by your clients or other parties is a cumbersome process.

With Rubix Signable you can get documents signed securely, legally and in a matter of minutes with our powerful software.

Imagine an envelope and inside this envelope you can have many documents and these can also be sent to many parties. Rubix Signable allows you to do send these documents easily from your SolCase or Visualfiles system.

Adding a document could not be easier. Simply send the document(s) using our software to the recipients email address and they, using a PC, Mac, Tablet or Phone can review and sign the document within seconds.

The email will be branded so they know its from you and receive instructions to help them sign the document.

Once signed a copy is sent to the signer and automatically imported directly into your case history. You can even trigger workflow from the back of the incoming signed document.

The real beauty of the software is that it is free to install and you only pay for each envelope you send.

---

# KEY BENEFITS

**Legal** - Rubix Signable complies with all EU and UK electronic signature laws covered by eIDAS. We go beyond meeting eSignature legislation by providing in depth tracking and a full audit log, tracking the document from start to finish. Rubix Signable documents are even admissible in court.

**One Click** – Installation of Rubix Signable includes a plug in to use on your existing SolCase or Visualfiles system. Once installed, one click allows documents to be sent securely and legally.

**Secure** - Your security is our number one concern. All your information, and your customers information, is stored securely and all pages are encrypted using bank level security. A full audit log, including IP addresses is available for every document signed through Rubix Signable. Your documents will always be legally valid and even if you decide not to use Rubix Signable your signed documents be always be secure and accessible to you.

**Integrates seamlessly**– Our software is designed to seamlessly work with Sol Case or Visualfiles.

**Pricing is incredibly simple**– We won't charge you hefty installation costs just pay monthly for each envelope you send. No risk and send as many or as little as you need.

**Installation takes minutes** – A simple installation is all it takes to utilise the power of Rubix Signable and you'll be glad to know this is free.
