

RUBIX ADDRESS FINDER

EASY AND ACCURATE ADDRESS FINDER

Designed to work seamlessly
with

WHAT IS RUBIX ADDRESS FINDER

Ensuring that you have accurate address information for customers and other contacts is important.

Rubix AddressFinder has been designed to be simple but powerful to allow you to find accurate address information from just a postcode.

Our software integrates with SolCase and Visualfiles meaning that your users have a seamless experience when using the software.

One click ensures that the information is instantly added to your Visualfiles Case Management Software.

Finally we don't limit the number of searches meaning that you don't have to worry about how much you use.

Simple, powerful and seamless. Rubix Address Finder.

KEY BENEFITS

Easy to use - Anytime you need to find address information within SolCase or Visualfiles simply click one button to search for an address.

Finding address information is easy – Start typing the postcode to obtain the address. A simple filter allows you to rapidly find the address information you need.

Accurate - The address information is accurate meaning that you can be certain you have rapidly obtained the information needed.

Integrates seamlessly– Our software is designed to seamlessly work with Sol Case or Visualfiles.

No limit to searching– Most postcode providers limit the number of searches or charge per search, we don't, just simple pricing and powerful software.

Installation takes minutes – A simple installation is all it takes to utilise the power of Rubix Address Finder.
